Summary

Full-Stack Developer (MERN) with 6 months of real-time product development experience delivering scalable, production-grade applications. Proven ability to design clean, modular architectures, build responsive frontends, and develop high-performance backend and real-time systems using modern web technologies. Experienced in authentication, distributed messaging, and database design, with a strong focus on code quality, performance optimization, and business-driven problem-solving.

Experience

Dvika | Full Stack Developer (MERN & AI)

- Engineered and deployed full-stack web applications using **Next.js, Node.js, and MongoDB**, improving API response times by 30%.
- Built modular RESTful APIs and optimized data flow across microservices to enhance scalability and maintainability.
- Enhanced CI/CD workflows using GitHub Actions and Docker, reducing deployment overhead by 40%.

Education

Indira Gandhi Institute of Technology | Master of Computer Applications (MCA)

- CGPA: 8.2/10
- Coursework: Data Structures and Algorithms, Computer Architecture, Computational Theory, Programming Languages

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Material UI, Firebase
Backend: Node.js, Express.js, FastAPI, RESTful APIs, GraphQL, JWT, PASETO, Bcrypt, Argon2
Database: MongoDB, MySQL, PostgreSQL, Firebase
Dev Tools: Linux, Git, GitHub, GitLab, Postman, VS Code, Docker, RabbitMQ, Swagger UI, Monorepo, pnpm

Projects

Banter – Real-Time Chat Application
Node.js + TypeScript + Socket.IO • Distributed Messaging Platform

- Designed and built a scalable real-time chat system supporting private and group messaging with low-latency WebSocket communication using Node.js, Express.js, TypeScript, and Socket.IO.
- Integrated Redis Pub/Sub to enable distributed event handling, real-time presence tracking, and horizontal scaling across multiple connections, while ensuring persistent message storage in MongoDB.

Dvika – LawTech SaaS Platform
MERN + AI • Subscription-Based Legal Workflow Application

- Built a cloud-based platform for law firms to manage case records, client data, and automated legal document summaries.
- Integrated Stripe subscriptions, JWT authentication, and OpenAI-based case summarization to enhance workflow efficiency.

Voltrax – Multi-Tenant eCRM System
MERN + Multi-Tenant Architecture • B2B CRM Platform

- Implemented tenant-based routing and role-based access control to ensure strict data isolation and secure multi-tenant access management across the platform.

- Implemented tenant-based routing, role-based access control, and AI insights to streamline customer engagement.

WonderFest Live Demo

MERN Stack • Wedding Planning Application

- Designed a fully responsive UI using Tailwind CSS and deployed the application on Netlify to ensure seamless cross-device accessibility.
- Integrated JWT authentication, MongoDB Atlas, and custom filtering for streamlined vendor management.
- Designed a responsive interface using Tailwind CSS and deployed the application on Netlify.

Uber Clone GitHub

MERN Stack • Real-Time Ride Booking Application

- Built a ride-hailing application featuring real-time ride tracking, driver-rider matching logic, and secure JWT-based authentication for protected API access.
- Integrated the **Google Maps API** and WebSockets for live updates; implemented Stripe payment processing.

Netflix Clone GitHub

React + Firebase • Movie Streaming Application

- Developed a responsive movie platform with protected routes, real-time search, and a personalized watchlist.
- Used the TMDB API to fetch content and implemented Firebase Authentication for secure sign-in.

Loan Calculator Application

React.js • Fintech Utility

- Built an interactive loan calculator with live EMI computation and amortization breakdown.
- Integrated a currency conversion API and implemented dark/light mode using React Context API.

Certifications

- Core Java Bootcamp – Udemy
- Advanced Java Collections, Generics, and Stream API – Udemy
- Complete JavaScript and TypeScript Course – Udemy (2023)
- MySQL Crash Course – Udemy
- Complete MongoDB Course – Udemy

Interests

- **Coding Challenges:** Regular participant on LeetCode and GeeksforGeeks, focusing on data structures and optimization.
- **Personal Projects:** Explore and prototype web and AI-based solutions to stay updated with emerging technologies.
- **UI/UX Design:** Design intuitive and visually appealing interfaces with emphasis on accessibility and responsive layouts.
